# STUDENT CHAPTER BYLAWS

Bylaws of the \_\_\_\_\_ College/University  
Student Chapter of Associated Builders and Contractors.

## PREAMBLE

The \_\_\_\_\_ Student Chapter of Associated Builders and Contractors is established to promote the principles and ideals of free enterprise in the construction industry. As such, the members of the student organization agree with those principles as stated:

We believe that the Merit Shop movement is a movement for the betterment of the individual, the construction industry, and the nation.

We believe in the system of free enterprise.

We believe that employees and employers should have the right to determine wages and working conditions, through either individual, or collective bargaining, as they choose within the boundaries of the law.

We believe that the employer has an obligation for satisfactory performance of assigned work. We support sound legislation in the areas of workers' compensation, safety and unemployment compensation. We believe legislation that embraces fair play for both employee and employer is essential to the preservation of the Free Enterprise system. The law should protect the right of employees to work regardless of race, color, creed, sex, or membership, or non-membership in a labor organization.

We oppose violence, coercion, intimidation, and the denial of the rights of the free working person, and free management.

We believe that the economy is incumbent upon all branches of government, and that government should award contracts to the lowest responsible bidder only. We oppose any unjust pressure to violate these principles.

# STUDENT CHAPTER BYLAWS

We believe that work opportunities in this nation should be made available to all people regardless of race, color, creed, age, sex, or national origin, and we support programs to this end. We believe that monopolies or any kind of price or wage fixing in either the public or private sector are detrimental to the system of Free Enterprise.

We believe that the destiny of all Americans can be best served by cooperation, reconciliation, and following the tenets of Free Enterprise, and democratic government. We believe persons engaged in business could best preserve these tenets by becoming active in politics and civics affairs. It is the purpose of the club to gather, receive, and disseminate such information that will help the student members to understand the role of the Associated Builders and Contractors in the construction industry

to further free enterprise within the industry. It shall accomplish this purpose by acquainting the student members with issues of importance in the construction industry and with the members of Associated Builders and Contractors through active involvement with the local contractor organizations and the Construction Education Foundation.
