

# ABC'S **TOP** PERFORMERS 2024

[abc.org/topperformers](http://abc.org/topperformers)

ABC's Top Performers listings are presented by these ABC strategic partners:

Delivering innovative solutions to increase your productivity and safety with unmatched durability for 100 years.

Helping members maximize productivity, improve performance and protect profits.

**Southwire**<sup>®</sup>

Providing innovative solutions and world-class service at every phase of the job.

Building a better future together—Your partner for a safe, productive and sustainable worksite.

ABC's strategic partners are hand-selected to help contractors win work and deliver that work safely, ethically and profitably for the betterment of the communities in which ABC and its members work.

# Steady as They Grow

**Business growth is never an accident. As five ABC Top Performer companies make clear, it results from a combination of tangibles and intangibles—including a proactive mindset, a commitment to health and safety and a pragmatic appetite for risk.**

Complacency isn't a word you'll find in the vocabulary of construction companies that are focused on growth. To thrive in an ever-changing, uncompromising marketplace, companies must continually grow, develop and improve their business strategies, goals and plans.

To find out what that means in 2024, we asked a group of Associated Builders and Contractors 2024 Top Performer member companies—which build the nation's most enduring, innovative, high-quality construction projects, ranked by work hours—how they pursue and nurture business growth. Their perspectives reflect a diverse array of both construction segments—including procurement, electrical, industrial services, concrete, HVAC and plumbing—and locations, such as California, Colorado, Maryland, Ohio, and Texas.

As it turns out, the success and vitality of construction companies nationwide depends on a mindset, strategic plan and goals that are the opposite of complacency. In our interviews, that boiled down to seven key takeaways:

## 1. The approach to growth opportunities is calculated and intentional.

"We need to clearly understand our capabilities and the opportunities the market is making available and then aggressively seek out and win those projects," says Dan Freese, CEO of United Group Services Inc., headquartered in Cincinnati. "We find opportunities that meet our existing skill sets and competencies."

According to Freese, constantly challenging itself is part of the 40-year-old industrial-services contractor's DNA, making growth opportunities easy to identify. "That's how we

best understand what the future holds," he says, "so we can position ourselves to win the opportunities."

Darlene East, president and CEO of Holes Inc., a specialty concrete contractor founded in 1972 and headquartered in Houston, agrees. Her company's approach is to

seek opportunities that complement its current portfolio of services. "Our executive team leaders are on the forefront of client communications, consistently working with our clients to identify jobsite challenges and concrete-removal needs," East says. "Our extensive involvement with industry associations, like ABC, also allows us to have

more candid conversations with industry leaders and gain valuable feedback that we can implement in our business practices.”

“Each decision we make as a company, individual leader or team member is based on health and safety”

—Darlene East, president and CEO,  
Holes Inc.

Cultivating trust with customers is essential to identifying growth opportunities, says Brent Greiner, president of Greiner Electric, a commercial electrical contractor based in Littleton, Colorado. The 27-year-old business has intentionally diversified its portfolio based on customer needs. “We want to make sure we have the foundation to handle our growth,” Greiner says.

Foundation and capabilities go hand in hand, according to San Diego-based Alpha Mechanical LLC, a mechanical and plumbing specialty contractor founded more than 20 years ago by Ukrainian immigrant Boris Barshak. More than 80% of the company’s customers are repeat clients. “Alpha approaches growth based on our resources first and foremost,” says President Renee Moore. “We ask how we can service our clients efficiently and effectively with the limitation we all face in business.

“Those limits can include a skilled workforce, talented management, equipment availability and financial strength,” Moore says. “Once those are answered, we strategically approach growth opportunities.”

Indeed, growth requires a thorough review of your strategic plan and market analysis—and targeting of new niches, says Robert “Buddy” Henley, president of Henley Construction Co. Inc. The 60-year-old commercial contractor, located in Gaithersburg, Maryland, relies on business partners, subcontractors and clients in identifying growth opportunities. “We listen to what they need,” Henley says. “When there is potential to do work with a good team, the stars can align.”

## 2. Health and safety go hand in hand with growth.

Health and safety are a core value for ABC Top Performer companies, deeply integrated into their decision-making processes because it’s the right thing to do. But it’s also directly tied to growth. “In order to grow your business, you have to have a great safety record,” says Brent Dugan, Greiner’s safety director. “Our safety program is key, and Greiner has a strong reputation as a safe contractor to work for, and we have grown our workforce through that reputation.”

East describes safety as a teamwide commitment at Holes. “Each decision we make as a company, individual leader or team member is based on health and safety,” East says. “Although we are a small company, we make large investments in safety. Our field personnel are trained to be competent in safety and possess 30-hour OSHA and basic-plus certifications, plus they receive excavation training and silica training—just to name a few.”

Safety is likewise a current and future investment for Henley Construction. “Our most important asset is our people,” Henley says. “We want to keep our team members safe and healthy, and that includes their mental health. We equip managers with the tools they need to accomplish this.”

Mental health and total human health are also directly tied to the growth of United Group Services. “We are focused on all aspects

of what is best for the craft professional,” Freese says. “That focus has brought us to a concentration on total human health, not just safety. I am a big supporter of counseling and suicide-prevention programs, and we even offer this to our subs. Everyone should have the opportunity to understand how important mental health is.”

### 3. And so do tech and innovation.

Technology and innovation are integral to increasing safety, productivity and profitability in the industry—so much so that their correlation to growth is undeniable. Moore attributes the quality of Alpha Mechanical’s projects to her leadership team’s innovative mindset. “It takes out-of-box thinking to engineer creative solutions and employ cutting-edge technologies,” she says.

“While continuous improvements bring change, quality must remain constant, and I’m proud that Alpha Mechanical adheres to the highest standards of quality in everything we do,” Moore continues. “We were one of the first regional specialty contractors to embrace design-build as a delivery method.”

Henley adds: “Tech and innovation help Henley Construction recruit the next generation of talent, and we make investments in the newest technologies,” said Henley. “Because of our membership with ABC, we have access to new, cutting-edge technology that puts us ahead of the competition and helps us find better ways to do things more efficiently.”

East credits Holes’ solid relationships with manufacturers and industry leaders to help the company stay in front of safety and equipment technologies. Along those lines, United Group Services grows with technology that improve accuracy and quality through preconstruction design and planning—such as lasers—by expanding its fabrication capabilities. “Tech and innovation allow us to understand our

productivity, improve our estimates, predict project outcomes and avoid change orders,” Freese says.

### 4. New geographies and market segments grow companies.

Henley Construction continues to expand its commercial contracting services in the Mid-Atlantic region through strong partnerships and promising opportunities. Similarly, United Group Services performs work in 48 states, choosing trusted clients that have growth opportunities for the services it provides. “We don’t have geographical boundary limitations, so we can focus on great clients,” said Freese. “Where there is a need and a challenge, we will step into it. We do the job well, then seek other opportunities.”

“Because of our membership with ABC, we have access to new, cutting-edge technology that puts us ahead of the competition and helps us find better ways to do things more efficiently.”

—Robert “Buddy” Henley, president,  
Henley Construction Co. Inc.

In its 27 years, Greiner Electric has grown from one location in Denver to five locations across Colorado and Wyoming. Holes has also branched out since it was founded in 1972, opening offices in Texas and allowing the company to mobilize and meet greater market demand. “The challenge to growth, however, is maintaining the level of exceptional service that our clients expect,” East notes. “To provide superior service, we implement extensive personnel recruitment processes that ensure that the right person

is hired for any Holes job, and that they will uphold our values, mission and vision.”

Other Top Performer companies make that connection as well. “Alpha has always serviced Southern California and will occasionally travel for the right client and the right project,” Moore says. “Bringing on the right talent opens the doors for growth geographically and in new markets.”

## 5. Growth results from a mix of organic and inorganic strategies.

Does business growth just happen—or is it something that requires deliberate effort? When we asked these Top Performer companies if they are contemplating organic growth strategies, such as leveraging existing resources and hiring talent in specific areas, or inorganic growth strategies, such as acquisitions and joint ventures, the answer was a resounding “both.” “At Greiner Electric,” Greiner says, “it’s a nice mix, because we don’t try to be all things to all people.”

But the mix of organic and inorganic growth ebbs and flows. “Historically, we have grown organically,” East says. “However, in the past three years, we have implemented inorganic methods of growth—for example, the purchase of new office space outside of Houston. We are looking at additional inorganic growth strategies in the future.”

The all-of-the-above focus at United Group Services means exceeding clients’ needs and meeting internal expectations. “All options are on the table when it comes to fulfilling those objectives,” Freese says. “We spend time understanding which industries will have work in the near future, and we are currently looking at another acquisition and new markets right now.”

Henley hat-tips ABC’s networking opportunities for his company’s organic and inorganic growth strategies. “We utilize organic strategies by bringing on new team members who have skills and competencies required to fit the market need,” Henley says.

“Our inorganic strategies include acquisitions of companies that complement our suite of services in a different geographic area.”

## 6. Risks are inevitable but essential to growth.

While the business of construction can be risky, East and her leadership team at Holes plan for and stay in front of those risks. “To avoid hiring pitfalls, we implement a hiring strategy to ensure that the prospective employee aligns with our values, and we then invest in new hires, providing them with the training, resources and mentorship needed to be successful,” East says. “To avoid planning pitfalls, our executive team meets monthly and evaluates current goals, adjusting as needed and creating future goals to ensure continued growth.”

Alpha Mechanical and Henley Construction both anticipate economic and business environment volatility and adapt to it, with Moore noting: “You must evolve to customer needs and market demands.” Henley adds: “General contractors are experiencing a lot of risks in the subcontractor community because of the tight market. GCs must be so vigilant in vetting their subs. Payment and schedule systems are key to mitigating risks, as are getting the work completed and paid as quickly as possible.”

United Group Services challenges itself on a consistent basis to seek what is best, even in the midst of risk. “Losing what got you here and change can create fear,” Freese says. “You must weight those fears against what is needed to improve for sustainable growth. You must step out of that comfort zone, but the fine line comes with not overstepping. It’s important to maintain the consistency while still growing.”

Greiner agrees that overstepping what you’re ready to do as a company can create risks, but that’s part of growth. “It’s easy to overstep and take on a project that could cost you,” Greiner says. “It’s important to be conservative and calculated in your growth.”

## 7. Culture feeds and makes growth possible.

The individual matters to top-performing contractors, which is why it's no coincidence that their business cultures are centered around their people. "The United leadership team does the hard work of making it easy—easy for our clients to build their projects, easy for our students to learn their craft and easy for our employees to choose United," Freese says. "We hire those who are aligned with our values, and we are group of competitive professionals who refuse to fail each other and our clients. It is that belief that attracts top talent."

Henley offers continual training at all levels, from teaching and training in Spanish to safety training and maintaining certifications to project-management academies, so its people can grow in their careers. "It helps us grow," Henley says. "I want to be there to help people. Every individual is different, so no one-size-fits-all answer addresses everyone's challenges."

Moore is also adamant that Alpha Mechanical's people are what sets the company apart. "We recruit, retain and promote the best field and support personnel for each position—from design to project closeout," Moore says. "As ultimate professionals, in addition to fostering our personnel's development, we are continually reviewing and optimizing our internal processes to assure both employee and customer satisfaction, as well as steady growth for our business."

That mindset feeds directly into Alpha Mechanical's organizational culture. "A firm's culture is the expression of core values—a set of beliefs held by the individuals at the top of the organization, flowing through all levels of the corporate environment," Moore says. "Culture is what happens in the Alpha Mechanical universe every day, a rich fabric woven of the threads of conversations, tasks and projects involving staff, clients and the professionals of various disciplines who support us."

The culture and mindset of Holes' employees is one of respect and dignity, allowing its team to take measured and carefully analyzed steps toward new endeavors and opportunities for growth. "Because of our culture, many of our employees have been a part of the organization for decades," East says. "We leverage our senior employees in terms of mentorship, client relationships and industry knowledge. We actively recruit from local colleges and universities to build the pipeline of talent. We provide excellent benefits and career paths."

"A firm's culture is the expression of core values—a set of beliefs held by the individuals at the top of the organization, flowing through all levels of the corporate environment."

—Renee Moore, president,  
Alpha Mechanical LLC

## Conclusion

"Between stimulus and response, there is a space," legendary management and leadership author Stephen R. Covey wrote. "In that space lies our freedom and our power to choose our response. In our response lies our growth and our happiness."

In other words, freedom of choice and growth operate in tandem. The freedom to make strategic decisions, to build a culture of trust, to navigate risks, to set boundaries and to upskill a workforce—it all creates limitless potential for a construction company to grow. When you look at it that way, who has time for complacency?

# What It Takes To Be a Top Performer

What defines the best of the best? ABC's Top Performers lists—the only rankings of their kind—recognize member contractors' achievements in safety, quality, inclusion, diversity, merit, project excellence and special designations, **ranked by work hours**. ABC's STEP Safety Management System and Accredited Quality Contractor program qualify members as Top Performers.

ABC's Top Performers are contractor members that achieved ABC STEP Gold status or higher (based on 2022 safety data) and earned ABC's AQC credential in 2023. ABC member companies are ranked No. 1 to 250—up from 200 in 2023—based on work hours reported on their 2023 STEP applications. Additional lists identify the Top General Contractors, Top Trade Contractors, Top Electrical Contractors, Top Plumbing/HVAC Contractors, Top Specialty Contractors and Top Performers by Market. Companies are recognized for National Excellence in Construction,<sup>®</sup> National Safety Excellence and National Inclusion, Diversity and Merit Excellence awards received in 2023.

The Top Performers With Special Designations list highlights ABC contractor members that achieved STEP Gold status or higher in 2023 and hold one or more special designations, ranked by work hours.

Top Performers had zero safety-related fatalities during the review period, Jan. 1-Nov. 1, 2023.

## The Criteria

ABC STEP members certify that:

- Their leadership is committed to industry-leading safety;
- Their culture is focused on preventing incidents from happening; and
- They deploy industry best practices in key components of the STEP Safety Management System, such as new hire safety orientations, toolbox talks and substance abuse programs.

STEP Diamond members are an average of 688% safer than the U.S. Bureau of Labor Statistics industry average, according to the ABC 2023 Safety Performance Report.\* STEP Platinum members are 278% safer, and Gold members are 183% safer.

\*[abc.org/spr](http://abc.org/spr)

ABC members that have earned the Accredited Quality Contractor credential certify their commitment to:

- The highest levels of quality construction;
- Financial fitness—capable, bondable and insurable to deliver the work they pursue;
- Industry-leading safety—all AQC members achieve STEP Gold, Platinum or Diamond status;
- Workforce development, talent management, and inclusion, diversity and merit; and
- The betterment of the communities in which they work.

AQC members must provide awards, certificates or letters of acknowledgement testifying to project excellence during the last five years and letters of recommendation from a combination of clients/owners, general contractors, construction managers, architects, subcontractors and suppliers/vendors.

# ABC's Top 250 Performers

Member contractors that achieved STEP Gold or higher and earned ABC's AQC credential in 2023, ranked by work hours. See pages 53-54 for definitions.

“We are focused on all aspects of what is best for the craft professional. That focus has brought us to a concentration on total human health, not just safety. I am a big supporter of counseling and suicide-prevention programs, and we even offer this to our subs. Everyone should have the opportunity to understand how important mental health is.”

—Dan Freese, CEO, United Group Services Inc., Cincinnati

The United Group Services executive team, from left to right: Brian Harvey, chief financial officer; Mark Mosley, founder/chairman; Troy Norvell, chief operating officer; Dan Freese, CEO; and Kevin Sell, core values officer.

## ABC Economic Analysis: Industry Retains Momentum Heading Into 2024

ABC's Construction Backlog Indicator finished 2023 down 0.6 months from December 2022, but its Construction Confidence Index remained elevated as materials prices fell, employment grew and nonresidential construction spending increased nearly 20% throughout the year. ABC provides same-day analysis of key government construction economic reports.

“Tech and innovation help Henley Construction recruit the next generation of talent, and we make investments in the newest technologies. Because of our membership with ABC, we have access to new, cutting-edge technology that puts us ahead of the competition and helps us find better ways to do things more efficiently.”

—Robert “Buddy” Henley, President, Henley Construction Co. Inc., Gaithersburg, Maryland

Henley Construction was the general contractor from 2018-2022 for the Oakton High School project in Vienna, Virginia, which included a complete building renovation, seven additions and site upgrades, as well as the construction of multiple athletic fields and structures.

## Excellence in Construction® Awards Honor 82 Projects Worth \$2.1 Billion

In 2023, ABC honored 82 merit shop construction projects for quality, complexity, attractiveness, unique challenges, completion time, innovation and safety at the National Excellence in Construction® Awards gala in Orlando, Florida. The winning projects—representing all contract types, sizes and market segments—achieved a high level of client satisfaction through efficient procurement methods and a diverse suite of construction technologies used by member contractors of all sizes.

“In order to grow your business, you have to have a great safety record. Our safety program is key, and Greiner has a strong reputation as a safe contractor to work for, and we have grown our workforce through that reputation.”

—Brent Dugan, safety director, Greiner Electric, Littleton, Colorado

Greiner was the electrical contractor for the 2018 remodel of Greiner Electric headquarters in Littleton, Colorado.

# Definitions

**8A** An 8(a) Business is a small business at least 51% owned and controlled by socially and economically disadvantaged individuals, as certified by the U.S. Small Business Administration.

**CBE (DC)** A Certified Business Enterprise is a business that receives preference in procurement opportunities offered by the District of Columbia government.

**CBSB (Prince George's County, Maryland)** The County-Based Small Business receives preference in procurement opportunities certified by Prince George's County.

**DBE** A Disadvantaged Business Enterprise is a for-profit small business where socially and economically disadvantaged individuals own at least 51% of the firm and control management and daily business operations, as certified by the U.S. Department of Transportation.

**DBE (Maryland)** A Disadvantaged Business Enterprise is a for-profit small business where socially and economically disadvantaged individuals own at least 51% of the firm and control management and daily business operations, as certified by the Maryland Department of Transportation.

**DBE (Virginia)** Disadvantaged Business Enterprise, as certified by Virginia Department of Small Business and Supplier Diversity, must be a small business as defined by the Small Business Administration, be at least 51% owned by minorities, women and/or socially and economically disadvantaged adults and have its day-to-day operations controlled by women or minorities.

**EBO (Howard County, Maryland)** Equal Business Opportunity Program regulates that 20% of Howard County's total dollar amount of all contracts be awarded directly to Minority, Woman-Owned and Disabled-Owned Business Enterprises (MBE/WBE/DBE) firms during each fiscal year.

**EDGE (Ohio)** The State of Ohio's Encouraging Diversity, Growth and Equity program is designed to assist socially and economically disadvantaged businesses in obtaining state government contracts.

**EDWOSB** An Economically Disadvantaged Women-Owned Small Business is at least 51% owned and controlled by one or more women who are U.S. citizens and who are economically disadvantaged, as certified by the U.S. Small Business Administration.

**HZB** A HUBZone Business operates and employs people in historically underutilized business zones, as certified by the U.S. Small Business Administration.

**LBE (California)** A Local Business Enterprise is a business with its primary place of business in San Francisco, as certified by the San Francisco Contact Monitoring Division.

**LGBTBE** An LGBT Business Enterprise is a business that is at least 51% owned and operated by LGBT individuals, as certified by the National LGBT Chamber of Commerce.

**MBE** A Minority Business Enterprise is at least 51% owned or controlled by minority individuals, as certified by the National Minority Supplier Development Council.

**MBE (Baltimore City, Maryland)** A Minority Business Enterprise is a business that is owned, operated, and controlled by one or more minority group members who have at least 51% ownership, and is located in the Baltimore City Market Area.

**MBE (Charles County, Maryland)** Minority Business Enterprise is a business that is owned, operated, and controlled by one or more minority group members who have at least 51% ownership as defined by Charles County, Maryland government and certified by Maryland Department of Transportation.

**MBE (Maryland)** A Minority Business Enterprise is a business that is at least 51% owned and controlled by one or more socially and economically disadvantaged individuals, as certified by the Maryland Department of Transportation.

**MBE (Prince George's County, Maryland)** A Minority Business Enterprise is any legal entity, other than a joint venture, that is at least 51% owned and controlled by one or more minority person(s), organized to engage in commercial transactions as certified by Prince George's County, Maryland.

**PEP (Dayton, Ohio)** The Procurement Enhancement Plan Program establishes aspirational goals to overcome barriers identified in the Third-Generation Disparity Study for the City of Dayton, Ohio, final report, Nov. 6, 2019, for minority-owned, woman-owned, small and local companies.

**SBE** A Small Business Enterprise is a small business as defined and certified by the U.S. Small Business Administration.

**SB (California)** A Small Business Enterprise is a small business as defined and certified by the California Office of Small Business and Disabled Veteran Business Enterprises.

**SBE (Florida)** A Small Business Enterprise is a small business registered to do business in Florida and is 51% owned and managed by a woman, veteran or minority who is a U.S. citizen or permanent resident alien, as certified by the Florida Department of Management Office of Supplier Diversity.

**SBE (Maryland)** The Small Business Enterprise is a small business as defined by the U.S. Small Business Administration as certified by the Maryland Department of Transportation.

**SBE (Texas)** The Small Business Enterprise Program offers small businesses another avenue to maximize their opportunities of doing business with the Texas Department of Transportation. The program applies to highway construction and maintenance projects that are funded entirely by state or local funds.

**SDB** A Small Disadvantaged Business is a small business in its primary industry and not less than 51% unconditionally and directly owned and controlled by one or more socially disadvantaged individuals who are U.S. citizens and are economically disadvantaged, as certified by the U.S. Small Business Administration.

**SDVOB** A Service-Disabled Veteran-Owned Small Business is at least 51% owned and controlled by a service-disabled veteran, with the daily management operations controlled by a service-disabled veteran or caregiver, as certified by the U.S. Department of Veterans Affairs.

**SWaM (Virginia)** The Small, Women-Owned, and Minority-Owned Business certification is a program of the commonwealth of Virginia that enhances procurement opportunities for SWaM businesses participating in state-funded projects.

**VOSB** A Veteran-Owned Small Business is at least 51% owned and controlled by a veteran, with the daily management operations also controlled by a veteran, as certified by the U.S. Department of Veterans Affairs.

**WBE** A Women's Business Enterprise is at least 51% owned or controlled by one or more women who are U.S. citizens or legal residents, as certified by the Women's Business Enterprise National Council.

**WOSB** A Women-Owned Small Business is at least 51% owned or controlled by one or more women who are U.S. citizens, as certified by the U.S. Small Business Administration or a third-party certification from the El Paso Hispanic Chamber of Commerce, National Women Business Owners Corporation, U.S. Women's Chamber of Commerce or Women's Business Enterprise National Council.

### **IDM ABC National Inclusion, Diversity and Merit Excellence Awards**

The annual ABC National Inclusion, Diversity and Merit Excellence Awards recognize members that display exemplary IDM leadership in their workforce, supply chain and community with best-in-class recruitment policies, retention practices, and training and mentoring programs.

### **NSEA ABC National Safety Excellence Awards**

ABC annually honors members that have created an industry-leading safety management system, demonstrate an uncompromising commitment to safety and share ABC's goal of achieving zero-incident construction jobsites. NSEA winners are selected based on STEP self-evaluation scores, lost workday case rates, total recordable incident rates, leading indicator use and process and program innovations. Only STEP Gold, Platinum and Diamond members are eligible to apply.

### **EIC ABC National Excellence in Construction® Awards**

ABC's National Excellence in Construction Awards program is the industry's leading competition honoring general and specialty contractors for innovative and high-quality merit shop construction projects. The winning projects, selected from entries submitted from across the nation, are judged on complexity, attractiveness, unique challenges overcome, completion time, innovation and safety.
