LADDER QUICK FACTS

Ladders were on OSHA’s TOP 10 VIOLATIONS OF 2018

20% OF WORKPLACE FALL INJURIES INVOLVE A LADDER.
IN THE CONSTRUCTION INDUSTRY, THAT PERCENTAGE INCREASES TO 81%

MORE THAN 90,000 people receive emergency room treatment for ladder-related injuries each year.

OSHA safety guidelines state that a three-point (two hands and a foot, or two feet and a hand) contact must be maintained on the ladder when climbing, which makes carrying tools and supplies difficult.

WHY LOW-LEVEL ACCESS PRODUCTS?

SAFETY
Enclosed platforms enhance safety by providing a preventative measure to keep operators in the platform.

PRODUCTIVITY
360-degree range of motion when working at height allowing operators to feel more confident and be more productive.

VERSATILE AND CONVENIENT
Replaces not one, but multiple ladders, including single-sided stepladders, twin stepladders, podium stepladders and platform stepladders.
